

VERTICAL SLIDING SASH

For a timeless, classical window style

Achieves 'A+' rating requirements

A MODERN DAY SOLUTION TO A TIMELESS CLASSIC

More and more homeowners and developers are choosing the Vertical Sliding Sash as the ideal uPVC window in classical or heritage settings. Its sliding sash styling closely replicates the look of the traditional sash window, but incorporates all the energy efficiency and benefits from a uPVC frame.

Goldseal Conservatories Ltd work with The VEKA UK Group to offer some of the most highly regarded uPVC products on the market. The VEKA UK Group have pioneered the design and manufacture of window and door systems for over 30 years. With a continual investment in the profile systems it is now one of the most technically advanced on the market. A 10 year guarantee on all products, gives the added confidence that once fitted VEKA products will last for many years. Just a few of the many reasons VEKA is now one of the most specified uPVC systems in the world.

Why choose Vertical Sliding Sash windows?

Retain that heritage feel

The VEKA Vertical Sliding Sash can help you recreate the look and feel of the original timber sash. Whether you're working with the local authorities to recreate a traditional look in a conservation area or simply just looking for a classical look, these are an ideal window choice.

For energy efficiency

There are many sliding sash windows on the market, but not all of them can achieve the required energy efficiency. Ours can achieve 'A+' through the Assure Energy Ratings Register.

Windows are one of the most exposed parts of a house. According to the Energy Saving Trust, a staggering 26% of all domestic heat loss escapes through the windows. Installing energy efficient windows is essential to help keep the cost of energy bills down.

For enhanced security

Security is a major consideration in the selection of any new windows and doors. Our Vertical Sliding Sash windows are designed with security in mind and with a few simple upgrade options can achieve the coveted Secured by Design (SBD) standard.

For easy maintenance

Not only do they look great, but they are efficient, secure and easy to clean. With an inward opening tilt facility cleaning can be done from inside the home.

Design

- A slim top sliding sash enhances sight-lines even when it couples to the bottom sash when closed.
- The bottom sliding sash is available with a deep bottom rail for that authentic look, this is then mechanically joined to give the appearance of a butt joint ('A' WER only available with this spec) and maintains the traditional timber feel. An enhanced bottom gasket is also included on the bottom sash for improved weather proofing.
- The cill is an integral part of the window to give that traditional feel. This truly comes in to play on bay windows where it's one piece design helps to give the appearance of one complete window when installed.

Glazing

- The modern design of the VEKA Vertical Sliding Sash enables it to utilise a 28mm thick sealed unit for optimum thermal performance and achieve an "A+" WER.

Fittings

- Each window comes with a pole ring on the top sash, a hook on the bottom sash and a lockable cam lock to secure them. This increases to 2 on each sash dependant on the width of the window.
- Each sash comes with the function to be tilted inwards to enable easy cleaning.
- Travel restrictors are fitted as an optional extra to maximise ventilation without compromising on safety.
- All fittings are available in white, matt black, satin chrome, bright chrome and gold.

Colours

- VEKA offer a fantastic range of laminated profiles to offer individual solutions and suit all tastes.
- Foils can be applied to one side or two and different colours can even be specified for the inside and out.

COLOUR CHOICES

Colour in the specification of windows and doors is one of the most important design features after the obvious quality and technical features.

VEKA offer a fantastic range of plain colours and wood finishes to offer individual solutions to suit all tastes. The colours of windows adapt themselves harmoniously to each and every installation.

Foils can be applied to one side or two and different colours can even be specified for the inside and out.

30 colour variations are offered as standard all supplied with a 10 year colourfast guarantee.

All VEKA profiles are available in a great range of foils and woodgrains as standard. Please note, colours shown are for guidance only and not a direct colour match.
